Predicted suffix-service distribution: psf__requests-1766, call 5
Discrete forest distribution (1 s bins); J ranks by the mean, QJ ranks by a lower quantile of the same distribution.
Predicted mean: 14.72 s
Observed: 10.29 s
90% interval: [2.88, 34.09] s
P(R > mean) = 39.1%
+4.4 s
long tail: 10% above 34.1 s
max 64.0 s
